Sustainability

We protect our natural world

OXYGEN GENERATION

We have planted more than 100 palm trees and more than 3.000 plants and trees.

SOCIAL RESPONSIBILITY

We favor the production and development of the local agricultural economy through the purchase of island products: potatoes, cheeses, fish, vegetables, fruit, wines.

CHARGING POINT ELECTRIC VEHICLE

In our facilities, we have charging points for electric vehicles.

CHEMICAL

We do not use bleach or chemical products for cleaning, which are not biodegradable.

We use salt to produce chlorine in swimming pools.

ENERGY

All the water is heated through biomass boilers.

All the electrical energy that is purchased is green energy.

Use of home automation in villas & common areas to more effectively manage lighting & air conditioning.

Use of light bulbs, low consumption LEDs and presence sensors.

ZERO PLASTICS

The entire hotel uses a waste recycling system in all its areas.

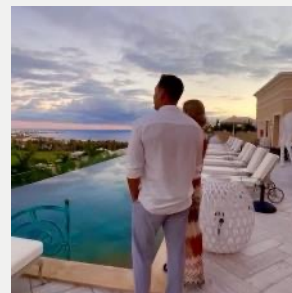

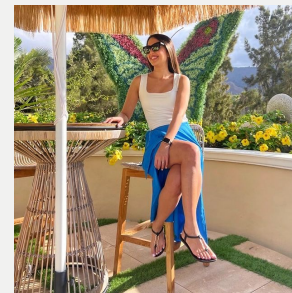

We do not use plastic items: garbage bags are biodegradable and so are shower caps.

We do not have single-use plastic items. Straws and glasses are biodegradable.

We have dispensers soap, body milk gel and hair conditioner to avoid products single-use.
